

# ENVIRONMENT ISSUES: Natural Disasters

Choose one of the four natural disasters described in the fact sheet **3.5 Environment Issues - Natural Disasters**.

## Activity 1

- Find a series of photos online (or draw them yourself!) to illustrate (or show) the flow of how the natural disaster occurs, from before it happened right through to the clean-up effort afterwards.

## Activity 2

- What can be done to prevent/predict natural disasters?

---

---

---

---

- Are there some areas in the world that are more prone to this type of disaster? Why?

---

---

---

---

## Did you know?

The wind speed of a violent tornado can reach up to 250 mph, and the damage it leaves in its path can also be up to a mile wide and 50 miles long!
