

Grow your Garden

Task One:

Decide how you would plan your own 'sustainable garden.'

- Which vegetables would you have?
- Which fruit would you grow?
- Don't forget the herbs for seasoning your food.
- Think about flowers that might attract bees for honey.
- Think about having chickens so you can get fresh eggs.
- And if you had room, what about a cow or a goat for fresh milk?

Now write a story about planning, preparing, planting, caring for and gathering your produce.

Task Two:

Look in your own garden and list the animals, birds and minibeasts you see.
