

Quick start Guide

- Sort the cards into separate piles.
- Open the app and choose a question from the selection screen.
- Pick the cards you think show the answer.
- Place them on a flat surface in front of you so the camera can see all the cards at once. Or better still use the 'card placement guide'. Then click 'Continue'.

- Point the camera towards the cards. The animations pop up on top of the card and a coin image will show at the side of the screen.
- Correct answer = a green tick and money in your piggy bank.
- Incorrect answer = 'Try Again' message. You can change the cards and try as many times as you like to get the question right.
- Choose the next question and repeat.
