

Fire and Heat

Read through the information on the fact sheet **Fire and Heat**. Design a poster to warn other children about the dangers of fire or heat (or both) in the home.

You could:

- create a general safety poster with fire/heat tips
- focus on one particular room (e.g. the kitchen)
- show what to do if there's a fire
- research the 'Stop, drop and roll' procedure and show this in your poster
- research different fire prevention items for the home (e.g. fire blankets, fire extinguishers, smoke alarms) and show these in your poster.

Remember:

- Make it eye-catching and easy to read.
- Make your messages clear, so they give helpful advice.
- Use pictures, diagrams or photos to make it more interesting.
